

I have already received solicitation calls from companies that I had previously conducted business with. I told them to remove us from the list and that I have already registered with the Do Not Call List. I confirmed my registration was at it's inception. They continue to call and tell us that it will take months to remove us from their calling list. I had thought it was a violation of the law for them to contact anyone on the list and I am very angry to hear that anyone would want to allow a loophole. I do NOT want ANY solicitation calls, no matter if I do business with the company or not. Do Not Call means "DO NOT CALL".
